**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) claims 1-22 (in part), drawn to benzodioxan compounds (A = B = O) and T = pyrimidinyl or quinazolinyl (Note that the quinazolinyl ring is attached is attached to the benzodioxan moiety via the pyrimidinyl not thru the phenyl).

Group II, claim(s) claims 1-22 (in part), drawn to benzodioxan compounds (A = B = O) and T = pyrazinyl.

Group III, claim(s) claims 1-22 (in part), drawn to benzodioxan compounds (A = B = O) and T = pyridyl.

Group IV, claim(s) claims 1-22 (in part), drawn to benzodioxan compounds (A = B = O) and T = benzofuryl.

Group V, claim(s) claims 1-22 (in part), drawn to benzodioxan compounds (A = B = O) and T = benzodioxanyl.

Group VI, claim(s) claims 1-22 (in part), drawn to benzodioxan compounds (A = B = O) and T = phenyl.

Group VII, claim(s) claims 1-8 (in part), 11(in part), and 20-22 (in part), drawn to others (e.g. benzodioxan compounds and T = aromatic group with one or more N atoms that don't fall in groups I-VII; A or B = CH<sub>2</sub> with T = pyrimidinyl; A or B = CH<sub>2</sub> with T = pyridinyl; A=B = CH<sub>2</sub> with T = aromatic group with one or more N atoms that don't fall in groups I-VII, etc.).

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

Art Unit: 1624

corresponding special technical features for the following reasons: the special technical features of Groups I-VIII are different one from the other. For example, the special technical feature of Group I is pyrimidine (six-membered ring with 2 nitrogens at 1,3-position) or quinazoline ring (pyrimidine fused to phenyl) that is not present in the special technical feature of Groups II-VII. The special technical feature of Group II is pyrazinyl (six-membered ring with 2 nitrogens at 1,4-position) ring and is different from the special technical feature of other Groups. Each substituent T on the benzodioxan ring has a special technical feature that is different from the special technical features of the other groups. The nature of the heteroatoms, size of the ring, and nature of the ring, etc. constitute a special technical feature.

In addition, applicants are required to elect a single disclosed species. Note that if applicants elect Group VII, further restriction may be required.

3. A telephone call was made to Ms. Harriet Strimpel on July 16, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants requested a written restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
